

A Smarter Path to *Lab Modernization*

Across the country, community and regional laboratories are facing unprecedented challenges. Modernization is no longer optional—it's essential for maintaining efficiency, quality, and reliability.

At Data Innovations, we help labs modernize with minimal disruption. Our vendor-neutral approach strengthens your existing environment while preparing your lab for what's next.

- Connect instruments, LIS, and EHR systems—without vendor lock-in
- Reduce turnaround time and free up staff with autoverification
- Improve quality, consistency, and compliance across workflows
- Achieve more with limited staffing resources
- Future-proof operations as volume and technology needs evolve

Built for Today's Realities — *And Tomorrow's Needs*

Lab modernization isn't a single project—it's an ongoing journey. Our solutions are designed to scale from one lab to many, helping organizations achieve measurable improvements without overwhelming staff or IT. We offer lab modernization made practical. Proven. Sustainable.

When Your Connectivity Middleware Is Truly Vendor-Neutral, *Your Options Are Limitless*

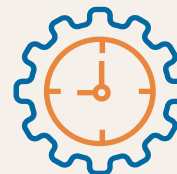

As the leader in lab middleware for more than 35 years, Data Innovations understands how to strengthen clinical laboratories with truly vendor-neutral software better than anyone else. Our flexible solutions put choice in your expert hands—so your lab can work smarter, achieve more, and focus on what matters most: your patients.

Set Your Lab Up for Success with *Vendor-Neutral Connectivity*

- Avoid vendor lock-in and costly driver replacements
- Centralize control of instruments and lab operations
- Maintain full control of your lab environment
- Reduce long-term costs by avoiding unnecessary replacements or upgrades

Raise the Roof on *Productivity*

- Autoverify up to 95% of test results
- Eliminate time-consuming manual reviews
- Standardize workflows to support quality care and patient safety

Enhance Operations with *Actionable Data Insights*

- Access performance data directly from IM middleware
- Track KPIs such as turnaround time, autoverification rates, and quality metrics
- Use insights to continuously improve lab performance

Expedite Quality, Compliance, and *Reliability*

- Catch issues before they disrupt productivity
- Reduce the chance of human error through automation
- Streamline reporting and compliance processes
- Improve uptime and recover quickly from unexpected downtime

Take the First Step Toward a *Smarter Lab*

See why DI is trusted by labs worldwide to simplify operations, improve performance, and support patient-focused care.
